I live on the border of Texas by Mexico unless I want to listen to only talk radio or Mexico's stations there is no choice here. And that is only when the weather is clear. That is why I bought my three xm radios. We do not have traffic and weather for our area as we are the most economically disadvantaged area, but when My husband and I travel we have found it to be of great help. The last time was going through Houston and knowing what freeways were closed down do to construction and accidents. We have also found it useful when there was street flooding and we are not from the area. Please reject the NAB's petition 04-160 and support Xm. Sincerly,]Sheryl H. Sarytchoff
